Fast learner, creative, digital artist, knack for aesthetics, self taught frontend developer(hands on experiece with html/css, javascript, reactjs, svelte), ui ux designer(3 months).

A multidisciplinary individual with background in
arts • web dev • design

applying for the role of ux/ui designer.

With a background in digital arts and relevant experience in HTML, CSS, and graphic design, I have taken the time to explore multiple disciplines out of curiosity and interest. I have gained six months of experience in graphic design and three months of experience in front-end development using ReactJS.

I am particularly interested in the field of UX design and believe that combining my previous experience in art and technology will enable me to excel in this field.

Experience

- 1. frontend web developer:** created simple and fully featured word processor for a website.
- 2. graphic designer:** creating daily creatives, logos, brand assets, business cards for multiple brands.
- 3. ux/ui designer:** during a 3 months course, created a case study and prototype of a fictional mobile app, which allow users to book services

Tools

adobe suite, photoshop, illustrator, xd, figma, sketch.
